Heat Relief would like to highly recommend Ron Correnti, President of IMS.

SIMOR is a management program that is very user friendly and has the tools that gives an owner like myself the flexibility to manage, view, update, measure, and control information regarding my company. SIMOR has given me the tools necessary to grow my net worth in my company by showing me the profit and loss in specific categories of my choosing. Above all else, SIMOR lets me generate specific reports that allow me to track my company's growth.

SIMOR gives you the ability to manage your employees without managing them, and also enables me to run reports on my customer's specific needs.

IMS has been a hands on team that has specialized in custom fitting their program so it would work specifically for your company. Their technical support has been very helpful and quick to resolve any issues that might have arisen, either by coming to my office to help or fixing a problem remotely.

I would recommend SIMOR for anyone who wants to know the financial status of their company.

Sincerely,

Mark DeFrancisco
